Professional Summary

Resourceful PMI-certified professional with a background in engineering, software development, and operations. Experienced in bridging technical and business teams to deliver SaaS and automation projects efficiently. Skilled in stakeholder coordination, Jira-based workflows, and process improvement through clear documentation and data-driven decisions. Quick to learn new systems, translate complex requirements into actionable tasks, and ensure smooth communication between clients, developers, and leadership in fast-paced, collaborative environments.

Key Skills & Tools

CRM and Onboarding

GoHighLevel (GHL), Stammer AI, Jira Service Management, Jira Software, Confluence, Zoom

Automation and Integrations

Zapier, n8n, Microsoft Power Platform, APIs, webhooks

Technical Foundations

JavaScript, React, HTML, CSS, Node.js/Express, Python

Data and Reporting

SQL, MongoDB, Excel pivot tables and macros, Power BI

Collaboration and Productivity

Slack, Microsoft Teams, Miro, MS 365, Google Workspace, GitHub, VS Code

Soft Skills

Problem solving, clear communication, stakeholder liaison, remote-team coordination, adaptability, continuous learning.

Professional Experience

MagnetLab – Sydney, NSW

Projects & Operations Lead | Jan 2024 – Present

AI automation and web development studio providing custom websites, CRM implementations, and automation consulting for small businesses.

- **Day-to-day operations:** Coordinated sprints, maintained Jira boards, and kept BAU delivery on track while updating Confluence documentation and SOPs.
- **Service definition:** Supported the definition of studio offerings including custom web development, UX/UI design, GoHighLevel (GHL) CRM setups, Stammer AI chat/voice agents, and automation services.
- **Operational setup:** Led early-stage operational setup including internal tooling, repositories, documentation templates, and a Jira Service Management support workflow.
- **Partner coordination:** Recruited and coordinated freelance developers and worked with Pez Creative Studios to align branding and UX/UI deliverables.
- **Client onboarding:** Created structured intake questionnaires, workshop agendas, implementation checklists, configuration notes, decision logs, and rollback documentation to reduce ambiguity and rework.
- **Referral & outreach support:** Drafted referral agreements and supported outreach initiatives, setting up basic lead capture and attribution workflows in GHL.
- **GTM support:** Worked with a B2B lead-generation specialist to refine ICP, messaging, and offer structure while testing early go-to-market channels.

PARTs DB Australia – Sydney, NSW

Automotive Subject Matter Expert – Operations Lead | May 2023 – Nov 2023

Automotive parts data SaaS and catalog platform providing fitment and product data to retailers, marketplaces, and suppliers.

- **Product & catalogue support:** Acted as SME for a 1 million-SKU automotive parts database, liaising with Genuine Parts Company (NAPA), eBay Motors and Amazon plus 40+ local suppliers to resolve VIN-fitment discrepancies and keep data accuracy high.
- **Ticket platform migration:** Led change management to move support from Freshdesk to JIRA Service Management, configuring a shared-ticket workflow that let sellers and suppliers collaborate in one thread without revealing contact details and saving several man-hours per fitment issue.
- **Data-quality and coverage analysis:** Created PostgreSQL queries and supplier-facing gap-analysis reports that compared each catalogue against the Australian vehicle market, flagging missing part coverage.

- **Offshore team leadership:** Managed an eight-member data-mapping team, trained them on the new Jira Service Management workflow, and introduced checklist reviews that cut rework from four–five passes to just two before customer sign-off.
- **Knowledge management & reporting:** Expanded the Confluence knowledge base with SOPs, supplier FAQs and onboarding guides, and delivered weekly dashboards in JIRA on issue volume and SLA performance to internal stakeholders.

Lenovo (Configuration Services) – Sydney, NSW

Configuration Services Engineer / Project Coordinator – DaaS | Mar 2021 – May 2023

Lenovo's configuration and deployment division supporting DaaS programs with standardized builds, logistics, and field-ready devices.

- **Device provisioning and logistics:** Managed 600–700 device-request tickets per month for enterprise clients (KPMG, Siemens, Fujitsu), covering new-hire kits, replacements, and graduate-program rollouts across multiple sites within Australia and overseas.
- **Process documentation:** Wrote step-by-step SOPs for configuration, asset-tagging, and dispatch that external fulfilment partners could follow without supervision, shortening their ramp-up time and keeping workflows consistent.
- **Stakeholder coordination:** Kept client procurement, IT and logistics teams aligned on schedules, handled exceptions and escalations, and maintained service-level targets with minimal breaches.

Tismor Health & Wellness – Sydney, NSW

Continuous Improvement Engineer | Sep 2020 – Mar 2021

GMP-certified contract manufacturer of health and wellness products, providing formulation, production, and high-speed packaging for brands.

- **Quality audits and documentation:** Ran internal GMP audits on two high-speed packaging lines, rewrote quality-control documents and SOPs, and addressed non-conformances before the next external inspection.
- **SOP overhaul:** Partnered with QA, compliance, and production leads to update more than 20 process SOPs, making instructions clearer for operators and reducing deviation write-ups on the line.
- **Process improvement:** Mapped the end-to-end packaging workflow, introduced a checklist hand-off between shifts and cut rework caused by labelling or fill errors.

PGH Bricks & Pavers – Sydney, NSW

Mechanical Engineer - Intern | Apr 2020 – Sep 2020

Australian manufacturer of clay bricks and pavers supplying residential and commercial construction projects.

- **Preventative maintenance and reliability:** Assisted engineers with weekly kiln and material-handling inspections, logging findings and scheduling follow-ups to minimize downtime.
 - **Engineering drawings:** Digitized and updated mechanical drawings to AS1100 standards, giving maintenance crews accurate references for repairs and redesigns.
 - **Inventory optimization project:** Created a searchable spare-parts catalogue, relabeled shelves and reorganized the storeroom by most-used items, which sped up parts retrieval and earned the site a “Gold Pillar” KPI rating for inventory management.
 - **Safety engagement:** Took part in daily toolbox meetings with fitters and technicians, updated WHS documents, and completed Job Safety & Environmental Analyses (JSEA) before maintenance tasks to reinforce safe-work practices.
-

Certifications

- PMI Agile Certified Practitioner (PMI-ACP)[®] – Project Management Institute
Issued Nov 2025 · Expires Nov 2028
 - Certified Associate in Project Management (CAPM)[®] – Project Management Institute
Issued Oct 2025 · Expires Oct 2028
 - Professional Year in Engineering (GradIEAust)
 - Startup Fundamentals – Incubate Program, University of Sydney
 - Google Cloud Generative AI Leader (in progress)
-

Education

Coder Academy – Diploma of Information Technology (Web Development)
Apr 2024 – Feb 2025

University of Sydney – Bachelor of Mechanical Engineering
Class of 2020

- Final-year thesis: “Numerical and Experimental Study of Externally Loaded Bolted Joints” – awarded Distinction
 - Team member, Formula SAE (FSAE) student racing team
-

Interests

Hands-on car maintenance • Product-management playbooks • Software engineering & AI tools • Startup ecosystems & founder biographies • Learning clear, persuasive communication.
